

EAU Signs License Agreement with Cadence Technologies, Inc. to Distribute Empowered Water™ Technology

ATLANTA (July 15th, 2010) – [EAU Technologies, Inc.](#) (“EAU” or “Company”) ([EAU:OTCBB](#)), a leading provider of electrolyzed water for high-volume, business-to-business applications, today announced a non-exclusive commercial relationship with Cadence Technologies, Inc., Alpharetta GA. Privately held Cadence, specializes in clean in place (“CIP”) applications in the food and beverage industries, has the rights to market EAU’s non-toxic technology, marketed as Empowered Water™.

EAU Technologies’ Clean-In-Place (CIP) systems provide stabilized, non-toxic electrolyzed water solutions which are proven to be effective cleaning treatments, killing pathogens including Salmonella, E. coli and Campylobacter without compromising the quality of the food or beverage products. Empowered Water™ has been tested as well as commercially installed in various industries such as beverage, poultry, produce, and dairy.

Empowered Water™ is created by combining salt and water with an electrical charge. The process separates the positive and negative ions of the water, creating two forms of fluid, one acidic and one alkaline. The electrolyzed alkaline water is used to clean, followed by a rinse of the electrolyzed acidic water to kill any remaining pathogens. Empowered Water™ has been proven non-toxic and environmentally friendly when used at approved concentrations. “This is a true game-changer. We haven’t seen anything with this type of potential in the Food and Beverage Industry in the past 20 years.” Glenn Cooper, President & COO of Cadence Technologies, Inc.

“Finding the right partner to roll out EAU’s Empowered Water™ to the food and beverage industry is the key to penetration. Empowered Water™ will change the way cleaning and sanitizing is done in numerous industries,” said Wade Bradley, President & CEO of

EAU Technologies. "EAU is the leader in developing industrial electrolyzed water technology. Our industry disruptive green solution has the ability to increase productivity, improve CIP performance, lower chemical costs, increase water savings, and reduce energy usage while minimizing wastewater treatment impact for our customers."

"Our relationship with EAU enhances Cadence's ability to serve its clients. Application of the new "Empowered Water" technology in Food and Beverage manufacturing facilities, equips processors with a sustainable option for protecting margins, improving operations and increasing employee safety", Hank Brink, CEO of Cadence Technologies, Inc.

About EAU:

EAU Technologies, Inc. (EAU) is a supplier of Electrolyzed Water Technology (EW Technology marketed as Empowered Water™) and other complementary technologies with applications in diverse industries. EAU's water-based and non-toxic solutions (at application concentration, the solutions are non-toxic to humans and live animals) may replace many of the traditional methods now used to clean, disinfect and nourish in large industries such as agriculture and food processing. EAU has solutions for existing bacteria, virus and mold proliferation threats. EAU continues to add innovative and efficacious products that offer a systemic approach to pathogen elimination in food processing plants and related industries, thereby producing safer foods while protecting the environment through "Green Technology." EAU has developed patent pending systems that are being used on dairies to process drinking water for dairy herds. Studies and trials are showing promising results at improving animal digestion which shows signs of improved animal health and production. EAU uses terms like "green", "natural", "non-toxic" and "organic" based on our NAMS studies that show no toxicity or cytotoxicity at levels as high as 70 ppm of HOCl. EAU uses only water, food grade electrolytes and electricity to create all of its solutions. "Safe Harbor" Statement under the Private Securities Litigation Reform Act of 1995

Statements in this press release relating to plans, strategies, economic performance and trends, projections of results of specific activities or investments, and other statements that are not descriptions of historical facts may be forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Such forward-looking statements may include without limitation, our expectations about the growth and the potential for the company, and Mr. Bradley's abilities to lead the company in that growth. Forward-looking information is inherently subject to risks and uncertainties, and actual results could differ materially from those currently anticipated due to a number of factors, which include, but are not limited to, risk associated with successfully developing our business in evolving markets, our need for additional capital, our continuing operating losses, the ability of our management to conduct distribution activities and sell products, possible failure to successfully develop new products, vulnerability to competitors due to lack of patents on our products, and other risk factors listed in our annual report on Form 10-K for the year ended December 31, 2008 and our other SEC reports. Forward-looking statements may be identified by terms such as "may," "will," "should," "could," "expects," "plans," "intends," "anticipates," "believes," "estimates," "predicts," "forecasts," "potential," "or continue," or similar terms or the negative of these terms. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. The company has no obligation to update these forward-looking statements.
